

CASE STUDY

HARANIA CREEK

Working together to deliver reliable infrastructure solutions for the Harania Creek project.

OVERVIEW

Infrapipe partnered with the Fulton Hogan team from the early stages of the **Harania Creek** Making Space for Water project to design and deliver a temporary wastewater diversion solution.

KEY FACTS

- ✓ **Location:** Harania Creek, Auckland, New Zealand
- ✓ **Scope:** The project involved the supply of a **52-metre-long, 3200mm diameter pipeline**, which was **expertly welded** by [Solo Plastics](#).

The installation was completed efficiently and without issue, ensuring a smooth transition of wastewater flows throughout the works.

OUTCOME

The successful collaboration between [Infrapipe](#), [Fulton Hogan](#), and [Solo Plastics](#) resulted in an outstanding outcome, with [Fulton Hogan](#) expressing their satisfaction with both the installation process and the final result.
