

STOCK UNDERPASS

STOCK UNDERPASS

Our **in house design** service is available to ensure correct pipe stiffness.

INFRAPIPETM underpasses are rated to **full highway loading (HN-HO-72)**.

Sizes up to **3.2m internal diameter** are available.

Pipes are very **light to install**, yet very strong. In most instances, a digger can install even the largest pipes.

Fully **recyclable**.

Any single pipe **lengths up to 12 metres** available.

Pipes can be either **pushed together (socket/spigot)** or **fusion welded**.
