

PRESSURE PIPE QUALITY ASSURANCE STATEMENT

■ All Infrapipe's products are manufactured and produced in New Zealand in accordance with the relevant AS/NZS standards. The current standards Infrapipe Ltd. are approved by ApprovalMark International are:

- AS/NZS 5065:2005 - Polyethylene and polypropylene pipes and fittings for stormwater and sewerage applications
- AS/NZS 4130:2018 – Polyethylene (PE) pipes for pressure applications

The standards Infrapipe Ltd. are in the process of applying and testing for are as follows:

- AS 2439.1:2007 – Perforated plastics drainage and effluent pipe and fittings (which will comply with TNZ F/2:2000 & TNZ F/5:2000)

Infrapipe pressure pipes are manufactured to the highest quality and comply with all the terms and conditions as stipulated by the governance of operating rules of the ISO Type 5 Scheme that meets or exceeds standards requirements AS/NZS 4130:2018.

Infrapipe pressure pipe is produced from 100% PE material and complies with the dimensions and ratings of pressure pipes outlined in the standard AS/NZS 4130:2018. Infrapipe customers can be assured that our PE100 pressure pipes produced in our New Zealand factory can expect to be provided with asset durability in excess of 100 years when installed per the Standards Operation Specification AS/NZS 2033 Installation of PE Pipe and Fittings.
